Mira

A VOICE-FIRST COMPANION

When words feel hard, start with a call.

Talk it through with Mira. Find one small next step when you are ready.

Built with Bolna voice AI | Symphony Buildathon

ONE CALM STARTING POINT

Start talking. Choose what helps next.

A few ways to meet the moment, without a fixed program.

BEGIN IN TALK

Say what is on your mind.

Call Mira, type, or hold to talk.

KEEP TALKING

Call Mira

Bolna voice agent

WRITE

Journal

Drafts saved on device

SPEAK

Hold to talk

Push-to-talk in Talk

TRY SOMETHING

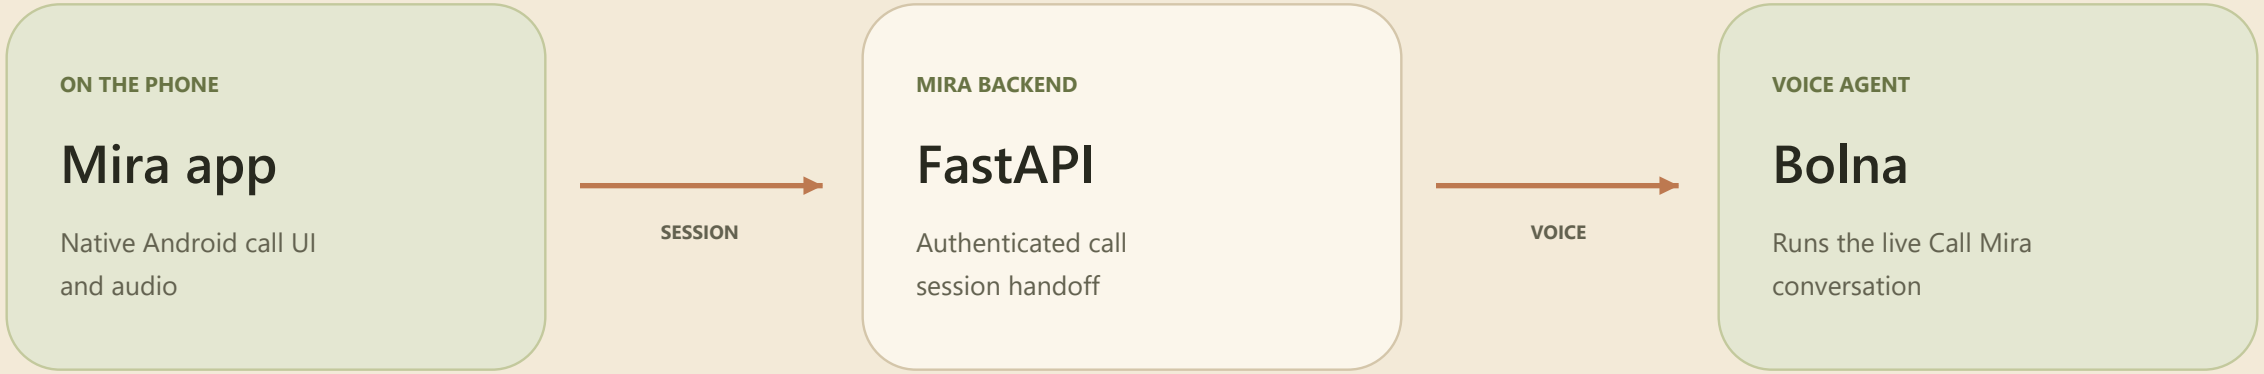

Activities

Optional small exercises

People move between these when they choose.

THE VOICE STACK

Bolna powers the call. The app shapes the experience.

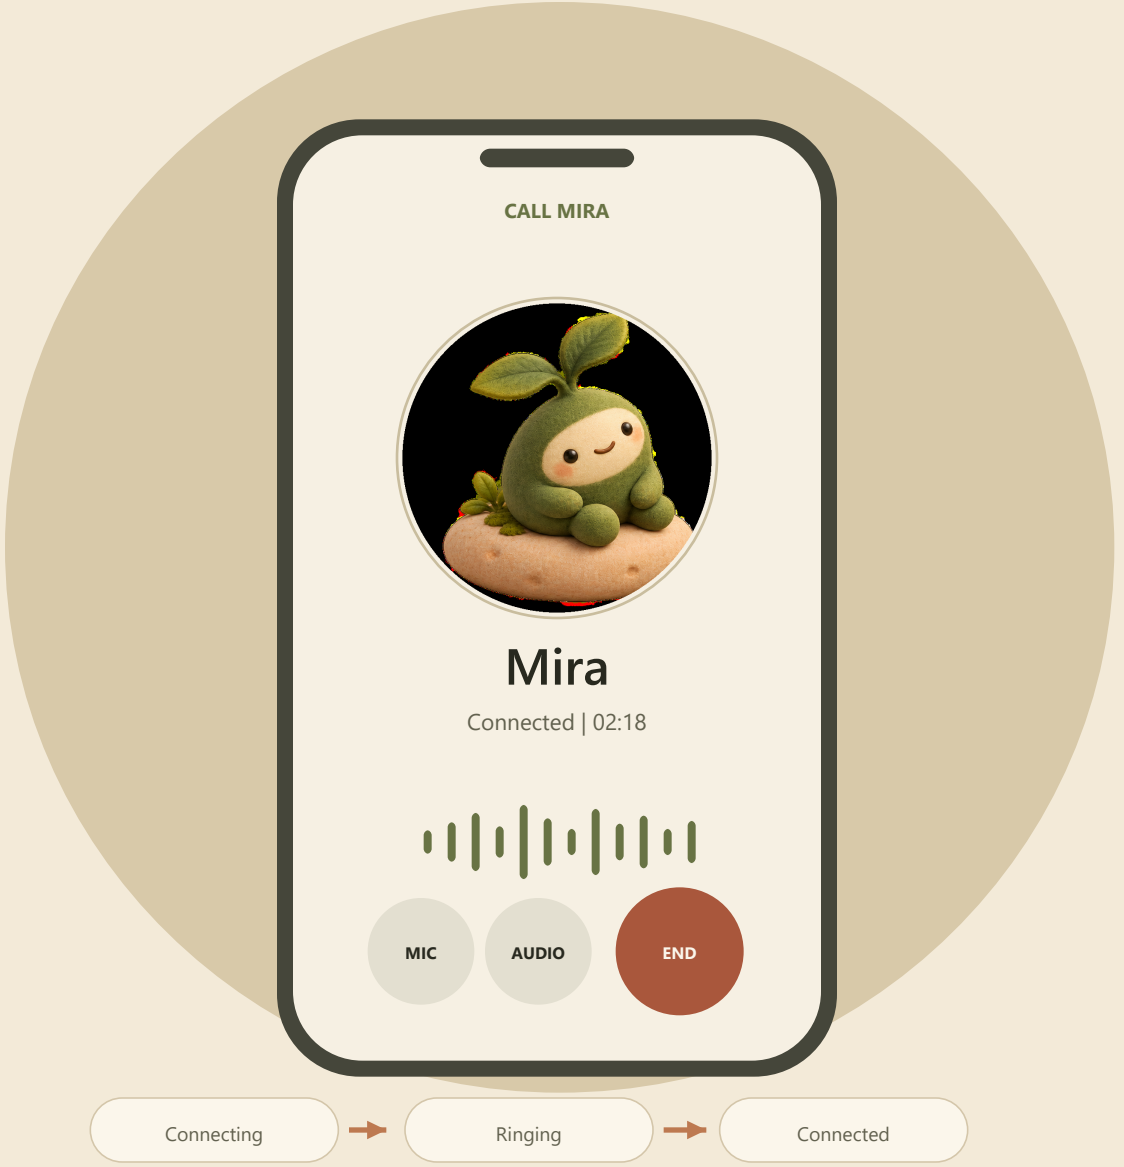

Separate Talk paths: OpenAI | text chat + hold-to-talk

CALL MIRA

A call screen built for a real conversation.

Connecting, ringing, then talking. The person can mute, change the audio route, minimize, or hang up.

1. Tap Call Mira from the app.
2. See the call state as Mira connects.
3. Talk naturally; end whenever you like.

BUILT, THEN VERIFIED ON DEVICE

Mira is ready for its next real conversation.

01 Bolna-backed Call Mira flow implemented in the Android app.

02 Talk, on-device Journal drafts, and nine optional Activities.

03 Next gate: standalone APK and physical call walkthrough.

Mira

Try Mira. Tell us where voice helps.

Can a voice-first companion make it easier to begin.

Explore the project

Video and APK links will be added to the form when they are ready.
